Subject: Application for Frontend Engineer Role - Benchmark Team

Dear Hiring Team,

I'm writing to express my interest in the Frontend Engineer position on your Benchmark team. As someone who's deeply passionate about clean UI, strong design principles, and building tools that actually make a difference, this role instantly stood out to me.

I recently completed my degree in Machine Learning and have been actively involved in building frontend projects where design meets performance. Most recently, I've worked on an AI-based SaaS platform using Next.js, MongoDB, and OpenAI - with a special focus on reducing loading times by 80% while delivering a highly interactive, customizable UI. Through this, I learned how important a solid design system is for both designers and developers to move faster without compromising on quality.

While I have 0-2 years of formal experience, I've built, tested, and debugged multiple real-world projects, both independently and in teams. I'm highly comfortable working with JavaScript, TypeScript, and Angular, and I also bring working knowledge of Web APIs, modern HTML/CSS, and

testing best practices. I care a lot about writing accessible, maintainable code, and I love collaborating with designers to make sure we're not just functional, but delightful.

What excites me about your Benchmark team is the intersection of engineering and design - I'd love to contribute to a system that not only powers UI but also empowers teams to build with consistency, speed, and confidence. I believe my hands-on experience, attention to detail, and eagerness to keep learning make me a strong fit for this role.

Thank you for considering my application. I'd love the opportunity to connect and share more about how I can contribute to your team. Looking forward to hearing from you!

Warm regards,

Mohit Sarawgi
